Department of Electrical and Computer Engineering
CSE215: Programming Language II

Assignment 02

Name : Md. Misbah Khan

Student ID : 2132089642

Course Title : Programming Language II

Course Code : CSE215

Section : 13

Faculty : Dr. Mohammad Abu Yousuf

Submission Date : 04/06/2023

Assignment Topic : Design and Implement of a Chat System using Synchronized
Multithreaded Programming

Code

```
package chat;
import java.util.*;

public class ChatProgram {
    private static Object lock = new Object();
    private static List<String> activeUsers = new ArrayList<>();
    public static void users() {
        activeUsers.add("user1");
        activeUsers.add("user2");
        activeUsers.add("user3");
    }

    public static void main(String[] args) {
        users();
        startChat();
    }
    private static int writer = 0;
    private static void startChat() {
        for (int i = 0; i < activeUsers.size(); i++) {
            String USER = activeUsers.get(i);
            Scanner sc = new Scanner(System.in);

            Thread thread = new Thread(new Runnable() {
                @Override
                public void run() {
                    while (true) {
                        synchronized (lock) {
                            while (!USER.equals(activeUsers.get(writer))) {
                                try {
                                    lock.wait();
                                } catch (InterruptedException e) {
                                    System.out.println(e);
                                }
                            }
                        }
                        System.out.print(USER + ": ");
                        String message = sc.nextLine();

                        if (message.indexOf("bye") != -1) {
                            activeUsers.remove(USER);
                            System.out.println(USER + " left the chat.");
                            if (activeUsers.size() <= 1) {
                                System.out.println("End of Conversation.");
                                stopChat();
                            }
                        }
                        int bye = -1;
                        if (bye == -1) {
                            writer = (writer + 1) % activeUsers.size();
                        } else {
                            writer = bye;
                            bye = -1;
                        }
                        lock.notifyAll();
                    }
                }
            });
            thread.start();
        }
    }
    private static void stopChat() {
        System.exit(0);
    }
}
```

Output

 Project ▾ ChatProgram.java ×

 Run ChatProgram ×

```
/Users/misbahkhan/Library/Java/JavaVirtualMachines/openjdk-20.0.1/Cor
user1: hi
user2: hello
user3: hey
user1: how are you all?
user2: fine
user3: fine
user1: where do you live
user2: Dhaka
user3: Mymensingh
user1: Shylet
user2: okay bye
user2 left the chat.
user1: bye
user1 left the chat.
End of Conversation.

Process finished with exit code 0
```

assign2 > src > chat > ChatProgram > startChat > anonymous Runnable > run

Flow Chart
